Dear All,

Hi. I am Prof. B. S. Ham who is in charge of EC5102 this semester. This is the third notice, but should be the first one to the new students registered this semester. Welcome to EC5102. Please, see the attached of previous email notice: very important!. The second notice was for the textbook 'Linear Algebra and its Applications,' 4th edition by Gilbert Strang and video conference tool. If you cannot find the textbook in the online mall, you may try www.kyungmoon.com. The attached is a revised syllabus.

The course EC5102 will be taught online due to Corona outbreaks through this semester. However, I am planning meeting you all in the classroom for the final exam. For the online class, EECS department has provided a video conference tool, 'Zoom,' and you will be invited to Zoom five minutes before the class via your gist email addresses. If you prefer to access via another email address, let me know in advance. For the first several classes, I believe there will be some technical problems to be accustomed. The official languages are both Korean and English. The office hour is on Tues at noon for an hour. A Telephone call is recommended at 062-715-3502 rather than physical visiting due to Corona. See you online tomorrow afternoon.

Dear All,

Regarding the textbook, you may try the following publisher if you cannot find it elsewhere: www.kyungmoon.com. The attached is a revised syllabus but tentative. I have not decided it yet how to meet you online, but we may try skype. Just in case my skype name is Ben (byoungnam19@gmail.com), and I will invite you all to the class (Linear Algebra) on March 16.

Dear Students,

Hi everyone. This is Prof. Byoung S. Ham for the class of Linear Algebra and its Applications. As all we know, we have an unexpected Corona situation now in S. Korea. By this reason, the class has been delayed by two weeks and will be taught online. The admin office is preparing the online class methods. If it is fixed, I will let you know, otherwise it will be run by You tube or Skype.

By the way, this class has been taught by Prof. ByeoungHa Lee over the last several years. Due to his sabbatical leave, I just substitute his class and give lectures based on his lecture notes for consistency. Of course the lecture notes are based on the textbook. So, I recommend you prepare the textbook until the first class scheduled on March 16.

Please refer to the Syllabus attached for your convenience. Check carefully the evaluation. This course covers first six chapters of the textbook. Midterm exam is up to Ch. 3.

Each homework due is the same day next week before the class regardless of holidays. You may submit it by email to me. For the email submission, just scan it, make a file, and attach it. A cell phone photograph is accepted. The file format is as follows: your name + date in pdf. Ex: byoungnam0302.pdf. You may ask any questions to me by email at any time. The format of the email subject is as follows: EC5102yourname.

Each lecture note will be emailed you after each class.

Official language for this course are both English and Korean.

Good luck to everyone!

Best,

BS Ham
